SUBJECT: Neville Chemical Company HRS Package

DATE: 07/21/2003

FROM: Kevin J. Wood, Asst. NPL/HRS Coordinator *Kevin J. Wood*
Brownfields and Site Assessment Section (3HS34)

TO: CERCLA File

This Hazard Ranking System ("HRS") Package for the Neville Chemical Company site was submitted to EPA Headquarters for their QA Review process in 1992. HQ determined, however, that the Region had not yet adequately demonstrated that the facility was unwilling and unable to comply with a 1991 RCRA Corrective Action order, and therefore was not eligible for NPL listing at this time. Since that time, RCRA Enforcement has continued to pursue the clean-up of the site.

No further work is anticipated on the HRS Package at this time. A complete copy of the September 1992 revision of the Package (Documentation Record and References) is being placed with this memo in §1d of the CERCLA file. Supporting materials (e.g., correspondence) are being placed in §1e of the file.
